Major Components

INSTALLATION INSTRUCTION / ACCESSORIES

OUR PRODUCTS INCLUDE THE FOLLOWING FUNDAMENTAL FEATURE

LIGHTWEIGHT and STRONG: stone coated steel roof tiles is a kind of Lightweight materials weighing about seven kilograms per square, only one-seventh of cement tile.

DURABILITY: stone coated steel roof tiles is a strong roof System close to Each other , fixed firmly level of tiles, which improve the integrity of roofing systems.

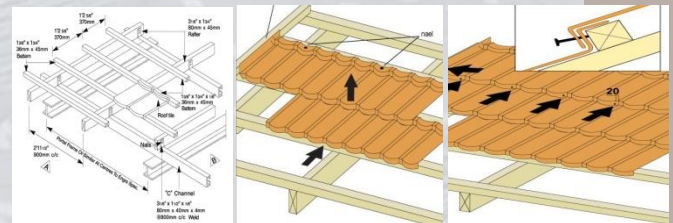

ECONOMY: stone coated steel roof tiles has a convenient construction and coverage of one piece is six times of traditional concrete or clay tiles and weight is only one sixth, thus installation, loading or unloading, storages are more efficient and effective. Once installed, the following maintenance costs are so limited and can be totally ignored.

CORROSION RESISTANCE: stone coated steel roof tile have superior long term corrosion resistance. The combination of a sacrificial protection of zinc with barrier protection of the aluminum provides superior performance to that of galvanized coatings in almost all environments. This all add up to significantly longer life.

FIRE RESISTANCE: stone coated steel roof has a high resistance to fire due to the components used in producing the unique panel.

SOUND RESISTANCE: - stone coated steel roof tile roofing Sheet/Tiles are 5mm thick which gives total sound proofing from rainfall noises. It is suitable for enclosed Buildings that requires no noise i.e. Halls, Churches, Mosque, Estates, Hotels, Farms, and Homes etc. It eliminates echo noises on sound speakers from rainfall.

OUR UNIQUE TECHNOLOGY

Our unique and patent technology allows the production of our unique coated metal roof tile made of Zinalume® {Alu-Zinc} Steel which covers today millions of square meters of roof surfaces all over the world. With products available in more than 100 countries commercializing roofing products, our light weight stone coat tiles are affordable and very easy to install. Our roofing solutions are a part of many families daily life. Our products respond to any needs of roofers: industrial, commercial, agricultural, private and public buildings as well as houses. All of this makes us the world's largest sorted after stone coat tile and a leading supplier of coated metal roof tile.

A STRENGTH BASED ON VALUES

The development of our unique product is a direct result of a balanced strategy that revolves around three core values.

Simplicity

Our brands philosophy is to offer equal and professional service to everyone. Whatever country our customers are from, we have technological expertise that serves the cause of our customers by providing them with a universal and user friendly solutions.

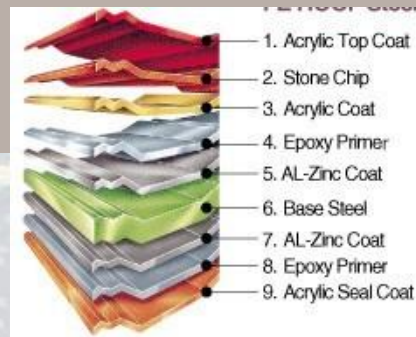

Reliability

Over a Decade of experience allow us to provide you with reliable solutions. Our products are the outcome of a unique technology. Indeed for the past years, our solutions have shown a great ability to meet our customers' needs. Today our products are used by millions in many ways and under different climates.

Commitment

We are working on building a responsible future. We are committed to be and remain our customers' choice partner. As an independent industrial company, we keep investing in research to improve with constantly more innovative and eco-friendly solutions.

STRUCTURE OF PANEL

LIGHTWEIGHT AND STRONG

Unlike other tiles, weight per square meter is only one sixth of the traditional concrete or clay tiles. With each tile fastened securely roof is resistant to wind uplift or rain penetration even in hurricane conditions.

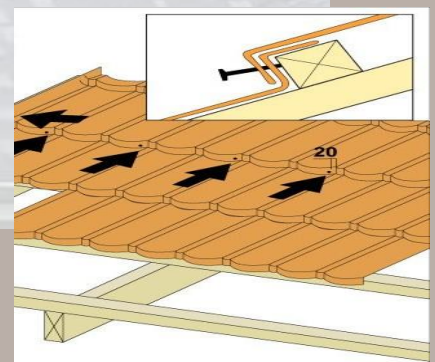

NATURAL STONE GRANULES

Tiles been coated with natural stone chips embedded in a basecoat and covered with an acrylic over glaze prevents corrosion, penetration of UV-rays blocking, to reduce rain noise, improve decorative effect and prevents fungi growth.

DURABILITY

Both Zinalume® and stone-chipped coating are non organic materials. They have credible and globally tested durability. The life span of tiles can be extended as more than 30 years guaranteed.

EASY AND SAFE TO INSTALL

Due to their light weight and installation friendly design, tiles can be installed over wood, steel battens or simple structures. Also perfect designs reduce installation time of roof by the users considerably and increase safety level. Cuttings produce no dusts which usually occur with concrete and clay tiles.

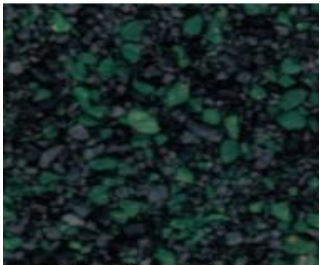

CLASSIC PROFILE

CLASSIC

Unique, Pleasant and Inspiring

As the name implies the outstanding design of Casablanca Classic has an attractive look and a finely corrugated structure that befits a style of class and tradition.
